

CEE electricity meter

Congratulations!

The CEE electricity meter adapter for camping and marina was the right decision. Its robust design ensures long service life, even under toughest environmental conditions.

During development work, particular importance has been attached to high-quality components. Among others, a German high-quality roller-type counter and the measuring equipment of a leading American manufacturer have been integrated.

The housing is waterproof and conforms with IP 67 protection class except for the connection devices.

The electronic system is permanently protected against condensate due to a special procedure.

The arrangement of the plug and the connector directly at the compact housing avoids line interruptions occurring sooner or later at the kinks when using intermediate meters with movable cable connections.

Voltage:	230V -10 +20%
Current:	16 A constant current (5/16A)
Frequency:	40-60 Hz
Counter:	5/2-digit
Accuracy:	2(1)%
Power consumption:	< 0.5 watt
Temperature range:	-30 + 50 °C
Protection class:	IP 44 plug/connector IP 67 housing
Weight:	approx. 0.3 kg
Dimensions:	60 x 70 x 180 mm (W x H x L)
